- ✓ Resistance to Drought, Diseases and Stresses

## Soil Remediator + Growth Stimulator

A soil fertility activator that **boosts** soil microbiota, **revitalizes** and **stimulates** the full spectrum of chemical, physical and biological properties of soil.

30%

Increasing soil absorption capacity + isolating heavy and toxic substances, petroleum products, and radionuclides.

50%

Reducing NPK application by up to 50%, and on heavily saline soils, mineral fertilizers can be completely eliminated.

# NATURAL LIQUID HUMIC CONCENTRATE

The ingredients are sourced from clean and natural locations, such as **mountain lakes** and **pristine deposits**, far from any industrial or urban pollution. **A NATURAL TREASURE!**

# RESEARCH AND CERTIFICATION

With over 30 years of scientific research, supported by trials and approvals in Europe and the Middle East, our company implements a unique and innovative method to extract humic acids and humates without the use of chemicals, solvents, or recycled components. The process preserves the original properties and quality of low-moor peat and sapropel, resulting in the production of liquid concentrates that provide an optimal balance of humic and fulvic acids, as well as other essential nutrients.

The components are sourced from clean and natural locations, such as mountain lakes and pristine deposits, far from any industrial or urban pollution, with careful consideration of the environment and a special focus on maximizing raw material utilization and achieving zero-waste production. Our technological processes adhere to international standards (ISO 9001:2015, 14001:2016, and 18001:2007), ensuring reliability and the highest quality of the products.
